

Lightroom Adjustment Brush Controls

Setting the Brush

Size:	Sets diameter of the brush (in pixels)
Feather:	Transition area (distance between circles)
Flow:	Controls <i>rate</i> of application (per stroke)
Density:	Controls <i>amount</i> of application

Limiting the Effect

Auto Mask (check box): Confines brush strokes to areas of similar color

Deleting the Effect

Erase:	Sets brush to remove effect
Reset:	Removes all adjustments
To Delete:	Select the pin for the adjustment and hit Delete

Setting an Overlay

H:	Show Pins for adjustment brush applications
O:	Show Overlay where adjustment brush applied
Shift+O:	Change color of Overlay

Additional Tips

- You can paint in a color by pressing the box next to the word Color.
- You can use multiple brushes (different sizes and effects) by using the A and B buttons.
- You can toggle the brush effect on and off using the switch on the bottom left of the controls.
